

The AMX command for activating URL-schemes (works only in iRidium):

IR_EXECUTE-<string>

Example of using the command:

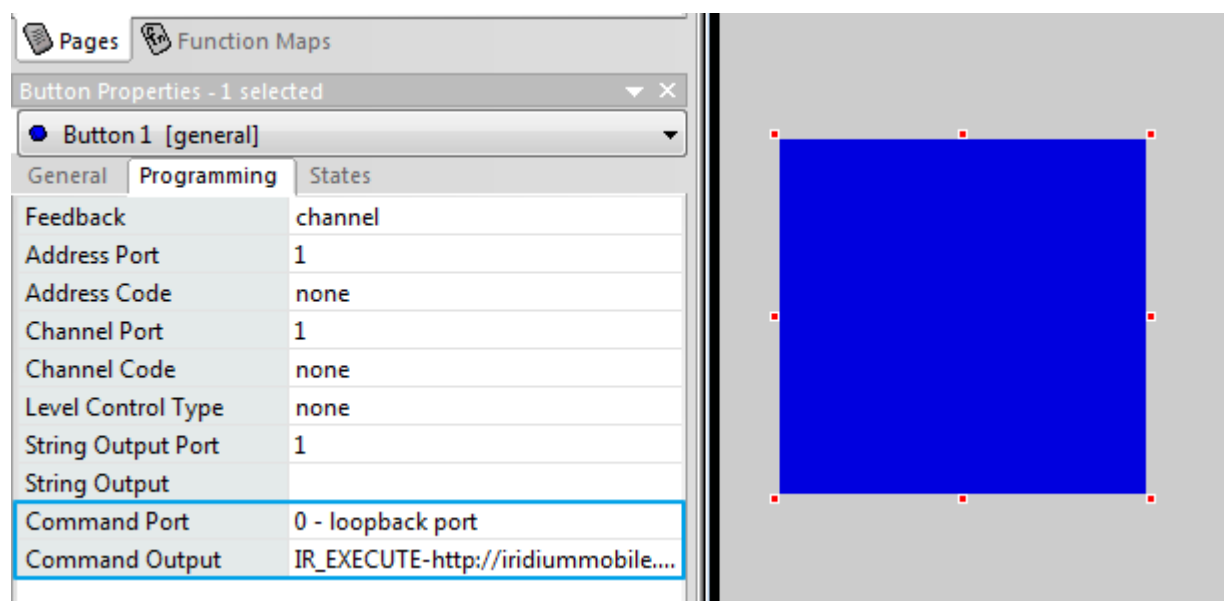

IR_EXECUTE-http://iridiummobile.net/

it will open the link to the resource iridiummobile.net in the standard browser of the control panel

IR_EXECUTE-music://

it will open the Music app on iOS

Example of the button in TPDesign4 by clicking which the URL-scheme will be activated:

Example of the command in Netlinx:

```
BUTTON_EVENT [10001:1:0,1]
{
  PUSH:
  {
    send_command 10001:1:0,"IR_EXECUTE-http://iridiummobile.net/"
  }
}
```
