

# iRidium for HDL-BUS Pro

Description on the web site  
Specification

Updated: 28.01.2014

## Contents

- [1 Instructions](#)
  - [1.1 Basic Operation of iRidium with HDL-BUS Pro](#)
  - [1.2 Examples of Controlling Equipment of the HDL-BUS Pro Bus](#)
- [2 Downloads](#)

**iRidium for HDL-BUS Pro** is a package of tools for creating interfaces and controlling automation system on the basis of HDL-BUS Pro equipment. iRidium enables connection of control panels to the bus via IP or RS232 interfaces, sending and receiving data about the state of bus devices and state changes on the real time basis.

*This manual introduces only the standard way of using iRidium for controlling equipment (without using scripts).*

**Licensing** of iRidium for HDL-BUS Pro ([more](#)):

- Device License Pro (HDL-BUS Pro) - a license for a control panel. It enables control of any equipment in the HDL bus via any HDL IP gateway.
- Site License Pro (HDL-BUS Pro) - a license assigned to an HDL IP gateway [Conditions for Using Site Licenses for HDL-BUS Pro](#). It can be uploaded on several control panels. The license works only if there is connection with the licensed gateway.

 When connection via the Internet using Site licenses, access to the bus have to be performed only via the licensed IP gateway.

## Instructions

## **[Examples of Controlling Equipment of the HDL-BUS Pro Bus](#)**

- [1 Relay Modules](#)
- [1.1 Creation of Commands for Relay Control in the iRidium Project Tree](#)
- [1.1.1 Commands for Setting up the Relay State](#)
- [1.1.2 Feedback Channels for Reading the Relay State](#)
- [1.1.3 Request for the Relay State at the Project Launch or Opening a Page](#)
- [1.1.4 Activation of Relay Module Scenes and Sequences](#)
- [1.2 Relating Relay Commands and Channels with Graphic Items](#)
- [1.2.1 Setting up the Relay State by Button](#)
- [1.2.2 Trigger Relay Switching by Trigger Button](#)
- [1.2.3 Displaying the Current Relay State](#)
- [2 Toggle Relays](#)
- [2.1 Creation of Commands for Toggle Relay Control in the iRidium Project Tree](#)
- [2.1.1 Commands for Setting up the Relay State](#)
- [2.1.2 Feedback Channels for Reading the Relay State](#)
- [2.1.3 Request for the Relay State at the Project Launch or Opening a Page](#)
- [2.1.4 Activation of Toggle Relay Scenes and Sequences](#)
- [2.2 Relating Relay Commands and Channels with Graphic Items](#)
- [2.2.1 Setting up the Relay State by Button](#)
- [2.2.2 Switching States of Toggle Relays by Button](#)
- [2.2.3 Switching States of Toggle Relays by Trigger Button](#)
- [2.2.4 Switching States of Toggle Relays by Trigger Button and Button](#)
- [2.2.5 Displaying the Current State of Toggle Relays](#)
- [3 Dimmers, DMX Controllers](#)
- [3.1 Creation of Commands for Dimmer Control in the iRidium Project Tree](#)
- [3.1.1 Commands for Setting Up the Dimmer Brightness](#)
- [3.1.2 Feedback Channels for Receiving the Dimmer Brightness](#)
- [3.1.3 Request for the Channel Brightness at the Project Launch or Opening a Page](#)
- [3.1.4 Activation of Dimmer Scenes and Sequences](#)
- [3.2 Relating Dimmer Commands and Channels with Graphic Items](#)

- [3.2.1 Setting Up the Brightness Value by Button](#)
  - [3.2.2 Changing Brightness by Level](#)
  - [3.2.3 Switching Two Brightness Values by Trigger Button](#)
  - [3.2.4 Changing Brightness by Up/Down Button](#)
  - [3.2.5 Displaying the Current Value of Brightness](#)
  - [3.3 Controlling RGB LED Lighting with Color Picker](#)
  - [4 Controlling RGB LED Lighting with Color Picker](#)
  - [5 Sensors, Input/Output Modules, IR Transmitters](#)
    - [5.1 8-in-1 Sensors, Motion Sensors](#)
    - [5.2 12-in-1 Sensors](#)
    - [5.3 Lux&Air, Temp&Lux Sensors](#)
    - [5.4 4-contact Module of “Dry Contacts” Inputs](#)
    - [5.5 4-contact Module of Connecting Temperature Sensors](#)
    - [5.6 IR Transmitters](#)
  - [6 Floor Heating, Conditioners – Control via DLP-panels](#)
    - [6.1 Floor Heating](#)
    - [6.2 Conditioners](#)
