

## Requirements to PC for Working with iRidium

- Microsoft Windows XP/7/8 OS
- Not less than 2 Gb RAM
- Not less than 1 Gb of free space on HDD
- 3D-video adapter with memory not less than 512 Mb

**Important!** It is required to start iRidium components on PC under Administrator account or using Administrator rights for correct work.

**Important!** The correct work of iRidium components is not guaranteed when working on **Windows OS Emulator** (for example, WineHQ). iRidium licenses might not work due to changing of virtual machine HWID .

**Important!** When hard disks of your PC work in the **RAID array**, every time it generates new HWID. Do not activate licenses for your PC with the RAID array, this mode should be turned off.

**Important!** If video card drivers do not support **OpenGL** (for Windows XP) and **DirectX 10** (for Windows 7/8) there might be errors when displaying graphics. Update your video card drivers if the graphics is displayed incorrectly.

## Requirements to Control Panels for Working with iRidium

At the moment [iRidium Apps](#) operate on the following types of control panels:

- **Apple iOS** based devices - V6 and later: iPad (later than the 1st), iPhone (3Gs and later), iPod touch (4 generation and later)
- **Windows 7/8** based devices: PCs, monoblocks, tablet computers
- **Android OS** based devices - V2.3 and later: smartphones and tablet computers (your device should have a GPS module and an SD-card)
